NO SCALE

Master Plan Improvements

- ▣ Add gravel at group camping areas to allow for a more flexible layout.
- ▣ Develop east side of campground with designated (marked and leveled) campsites and group camping areas.
- ▣ Add pull through sites where feasible.
- ▣ The Designated Summer Beach Access points indicate the below high water line ingress/egress area for beach recreation activities and boat launching and retrieval. Future campsites (group and other) are permitted below high water line when appropriate.
- ▣ Add overflow parking area.
- ▣ Convert existing sites to double campground sites where feasible.

BOYSEN STATE PARK - TOUGH CREEK CAMPGROUND PHASE 2 IMPROVEMENTS
